Cyber Monday

Like the ninth-gen iPad, the sixth-gen iPad Mini was released a year ago, but it got a redesign with an 8.3-inch display, A15 Bionic chip, a USB-C charging port for a quick charge and a power button with Touch ID that makes it feel brand-new even in 2022. Holiday sales currently offer \$99 savings on both storage tiers, a welcome price drop if you're looking for a superportable iPad for a great deal.

The iPad Air from early 2022 is sometimes on sale, and a great choice as a more affordable iPad Pro alternative. Its M1 processor makes it fast, but it lacks the better faster-refresh displays of the iPad Pro models.
